At YOUTH

LTTA IN BEJA (PORTUGAL)

During the 16th-22th of January 2023, 29 participants took part in the LTTA (Learning Teaching Training Activity) in Beja (Portugal).

It has been a wonderful opportunity to test the IO2 "Training Course Framework for youth workers on dissemination strategies and podcasts" that has been developed by all the partners. Participants analyzed the different phases that bring to the creation of a podcast, defining which are the key aspects to be considered when organizing a TC on podcast.

All partners were bringing their expertise and organized different sessions, providing theoretical and practical parts. Similarly, we have begun the development of the project's IO3 focused on the creation of podcasts related to the Erasmus + youth sector and project design.

TESTEMONIALS

"The project was very enriching for me because not only I have learnt all the basics about podcast, but I have also met a lot of nice people"

"It was overall a nice experience. Everyone was kind"

"This training was really good with a calm and objective environment. The trainers gave us the tools to successfully create a podcast."

UPCOMING STEPS

Based on the LTTA's evaluation, the final IO2 document will be adjusted and defined.

Partners will be working on the definition and implementation of IO3, which foresees the creation of 10 podcasts related to the theme of Erasmus +. Each partner will be responsible for the development of 2 podcasts.

The partners will have the opportunity to analyze the results achieved and the next objectives of the project during the next TPM (Transnational Project Meeting) which will take place in Greece.
